Waveguide Couplers Technical Data Sheet

PE-W12CP001-10

The PE-W12CP001-10 is a millimeter-wave directional waveguide coupler that operates in the frequency range of 60 to 90 GHz (E Band). This E band component offers a nominal coupling level of 10 dB, mean coupling accuracy of +/- 1, coupling flatness of 1.5 dB, and has a maximum VSWR level of 1.2:1. The design is made of gold brass copper and incorporates a multi-hole configuration that results in typical directivity of 30 dB. Common applications for this millimeter wave component involve test setups where power reflection measurements are required that might involve power sampling and frequency monitoring with minimal signal loss to the main transmission path. This H plane coupler uses integrated WR-12 waveguide ports with UG 387/U flanges. Pasternack offers a complete family of waveguide millimeter wave directional couplers that are in-stock for same day shipment.
