Description

Pasternack's PE2PB1002 RF Coaxial GS probe is part of our full line of RF components available for same-day shipping. These RF coaxial probes are designed to connect RF sources, analyzers and oscilloscopes to microwave circuits, PCB and test fixtures. These microwave coaxial probes are available in GS (SG) and GSG variants. They can be used manually with a coaxial cable assembly or with our optional probe positioner to characterize devices, troubleshoot or make signal integrity measurements. Pairs of coaxial GS probes can be used in tandem with delay matched cable assemblies to perform high speed differential measurements.

Our RF Coaxial GS probe datasheet specifications and drawing with dimensions are shown below in this PDF. Pasternack's broad catalog of RF, microwave and millimeter wave components allow designers to configure and customize their signal connections however they like. Whether the need is to provide signal integrity probing or device characterization, Pasternack can ship you the right components same day.
