RF Cable Assemblies Technical Data Sheet

Description

Pasternack's low PIM plenum cable assemblies using SPP-250-LLPL coax and right angle N male to right angle N male connections are part of our full line of RF components available for same-day shipping. These right angle N male to right angle N male plenum coax cable assemblies deliver low PIM performance to support Distributed Antenna Systems (DAS) and other complex, multi-carrier communication systems. The SPP-250-LLPL coax cable has been certified in accordance with UL910 for plenum coaxial cable installations. Each right angle N male to right angle N male cable assembly is 100% tested for Passive Intermodulation (PIM) and the tested value is marked directly on the cable.

Our right angle N male to right angle N male cable datasheet specifications and drawing with dimensions are shown below in this PDF. Whether the need is to provide a low PIM jumper connection, low PIM test cable or simply create a custom cable assembly configuration, Pasternack has the right cable assemblies for the job.
