Description

Pasternack's new line of BNC test cables built on our PE-SF200LL coax are optimized for use up to 3 GHz. The highly flexible low loss coax design improves the usability of the test cables reducing the strain applied to your test components while making it easier to route the cables in your test setup or equipment rack. The flexible coax cable has excellent electrical properties including low insertion loss and >100 dB of shielding effectivity. These 3 GHz test cables are available with Male and Female BNC connector options and are stocked in standard lengths and available for same day shipment.
