

BNC Male to BNC Female Low Frequency Low Loss Cable Using PE-SF200LL Coax, RoHS

RF Cable Assemblies Technical Data Sheet

Configuration

- Connector 1: BNC Male
- Connector 2: BNC Female
- Cable Type: PE-SF200LL

Features

- Durable BNC Male and BNC Female options
- 1.35:1 VSWR to 3 GHz
- 76% velocity of propagation (VoP) low loss coax
- 100% VSWR tested and Hi-Pot tested to 500 volts
- · Very flexible and durable
- · Enhanced strain relief, heavy duty booting
- · In-stock and ready to ship

Applications

- · Production testing up to 3 GHz RF development testing
- General lab testing
- Test rack applications

Description

Pasternack's new line of BNC test cables built on our PE-SF200LL coax are optimized for use up to 3 GHz. The highly flexible low loss coax design improves the usability of the test cables reducing the strain applied to your test components while making it easier to route the cables in your test setup or equipment rack. The flexible coax cable has excellent electrical properties including low insertion loss and >100 dB of shielding effectivity. These 3 GHz test cables are available with Male and Female BNC connector options and are stocked in standard lengths and available for same day shipment.

Electrical Specifications
