

Whip Antenna Operates From 698 MHz to 870 MHz With a Typical 2 dBi Gain SMA Female Input Connector IP67 Rated

TECHNICAL DATA SHEET

PE51154

Pasternack's ¼ wave portable omni whip antennas feature a textured black finish and a strain-relief base to ensure durability and repeatable RF performance. Our ¼ wave portable omni whip antennas are availabile with operating frequencies as low as 400 MHz and as high as 960 MHz. These antennas are offered with gain ranges from unity to 2 dBi. The omni-directional radiation pattern and IP67 rating make these antennas ideal for mobile radio communications.

- Operating frequencies from 400 MHz to 960 MHz
- Gain ranges from unity to 2 dBi
- · VSWR less than 2:1, in most cases
- 50 Ohm Impedance
- IP67 Rated
- Variety of connector types available (SMA Female, MX, or MD) for use in many portable handheld radio applications.
 See below for common brand & connector combinations.
- MX (1/4-32 x 7/32) Commonly used in: Motorola, Radius, Saber, Saber+, Spirit, Expo, Kenwood, Maxon, Midland, Wilson, GE Monogram, and Vertex Standard.
- MD (M7 x 1.0) Commonly used in: GE
- SMA Female (SF) Commonly used in: Motorola, Visar, and Kenwood

Configuration

Design Whip Portable
Frequency Range 698 to 870 MHz
Polarization Vertical
Interface 1 SMA Female
Number of Output Ports 1

Electrical Specifications (Values at 25°C, sea level)

Description		Minimum	Typical	Maximum	Units
dance			50		Ohms
al Gain		2			dBi
