Description

The PE80L2005 is an Signal Limiter that operates in the 5 MHz to 18 GHz frequency range. The Limiter has up to 5 Watts CW input power handling capability with a +18 dBm max leakage output power level and +50 dBm peak input power. Typical performance includes 2 dB max insertion loss, 1.8:1 typical input VSWR, and a fast response and short recovery time of 15 μ sec. The excellent technical performance is achieved through the use of thin film stripline circuit construction. The low profile pin package supports field replaceable SMA connectors and can be drop mounted onto a PWB. The Limiter is designed for high reliability and meets MIL-STD-202F environmental test conditions for Humidity, Shock, Vibration, and Altitude.
