

Configuration

- 7/16 DIN Male Connector 1
- 7/16 DIN Female Connector 2
- 50 Ohms
- Low PIM Design
- Straight Body Geometry

Features

- Max Return Loss of -21 dB up to 8 GHz
- PIM levels lower than -170 dBc
- 7/16 DIN Interface compliant with IEC 169-4
- Silver Plated Contact
- 200 µin min Silver Contact Plating

Applications

- Connector Saver
- General Purpose Test

Description

Pasternack’s PE91028 Low PIM 7/16 DIN male to 7/16 DIN female adapter is part of our full line of RF components available for same-day shipping. Our 7/16 DIN to 7/16 DIN adapter has a male to female gender configuration in a Low PIM design. PE91028 7/16 DIN male to 7/16 DIN female adapter operates to 8 GHz. The PE91028 Pasternack RF adapter can also be used as a connector saver to extend equipment life.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
