

BNC Tee Adapter Male-Female-Female

RF Adapters Technical Data Sheet

PE9174

Configuration

- BNC Male Connector 1
- BNC Female Connector 2
- 50 Ohm
- Tee Body Geometry

Features

- Max VSWR of 2.1:1 up to 100 MHz
- Gold Plated Phosphor Bronze Contact

Applications

- General Purpose Test

Description

Pasternack's PE9174 BNC Tee adapter male-female-female is part of our full line of RF components available for same-day shipping. Our BNC tee adapter has a male-female-female gender configuration. Our BNC tee connector operates to 100 MHz. The Pasternack RF adapter provides good VSWR of 2.1:1 maximum. Tee adapters (also called tee connectors) are three port devices that can be used to split or combine a signal. Unlike power dividers/combiners, however, they do not provide matched impedance at all ports.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.

Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Frequency Range	DC		100	MHz
VSWR			2.1:1	
Operating Voltage (AC)			500	Vrms

Mechanical Specifications

Size	
Length	1.56 in [39.62 mm]
Width	0.57 in [14.48 mm]
Height	0.9 in [22.86 mm]
Weight	0.06 lbs [27.22 g]
