

# MHV Female to MHV Female Adapter

## RF Adapters Technical Data Sheet

PE9267

### Configuration

- MHV Female Connector 1
- MHV Female Connector 2
- 50 Ohms
- Straight Body Geometry

### Features

- Max VSWR of 1.3:1 up to 300 MHz
- MHV Interface compliant with MIL-STD-348A
- Gold Plated Brass Contact
- 30 μ-in min Gold Contact Plating

### Applications

- General Purpose Test

### Description

Pasternack's PE9267 MHV female to MHV female adapter is part of our full line of RF components available for same-day shipping. Our MHV to MHV adapter has a female to female gender configuration. PE9267 MHV female to MHV female adapter operates to 300 MHz. The Pasternack RF adapter provides good VSWR of 1.3:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
