

BNC Twinax Tee Adapter Jack-Plug-Jack

RF Adapters Technical Data Sheet

PE9375

Configuration

- BNC Twinax Jack Connector 1
- BNC Twinax Plug Connector 2
- 78 Ohms
- Tee Body Geometry

Features

- BNC Twinax interface compliant with MIL-STD-348
- Contact plating according to MIL-G-45204
- Gold over Nickel Plated Beryllium Copper Contact

Applications

- General Purpose Test

Description

Pasternack's PE9375 BNC Twinax tee adapter jack-plug-jack is part of our full line of RF components available for same-day shipping. Our BNC Twinax tee adapter has a jack-plug-jack gender configuration. Tee adapters (also called tee connectors) are three port devices that can be used to split or combine a signal. Unlike power dividers/combiners, however, they do not provide matched impedance at all ports.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.

Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Operating Voltage (AC)			500	Vrms
Dielectric Withstanding Voltage (AC)			1,500	Vrms
Insulation Resistance	5,000			MOhms

Electrical Specification Notes:
Values at 25°C, sea level

Mechanical Specifications

Size	
Length	1.143 in [29.03 mm]
Width	1.341 in [34.06 mm]
Height	1.03 in [26.16 mm]
Weight	0.055 lbs [24.95 g]
