

SMA Female to UHF Male Adapter

RF Adapters Technical Data Sheet

PE9415

Configuration

- SMA Female Connector 1
- UHF Male Connector 2

- •50 Ohms
- Straight Body Geometry

Features

Max VSWR of 1.3:1 up to 300 MHz

Gold Plated Contact

Applications

Allows Connection Between Series

General Purpose Test

Description

Pasternack's PE9415 SMA female to UHF male adapter is part of our full line of RF components available for same-day shipping. The SMA connector mates mechanically with commercially available 3.5mm and 2.92mm (K) connectors. Our SMA to UHF adapter has a female to male gender configuration. PE9415 SMA female to UHF male adapter operates to 300 MHz. The Pasternack RF adapter provides good VSWR of 1.3:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
