Description

Pasternack's PE9531 TNC female to reverse polarity TNC male adapter is part of our full line of RF components available for same-day shipping. Our TNC to reverse polarity TNC adapter has a female to male gender configuration. PE9531 TNC female to reverse polarity TNC male adapter operates to 6 GHz. The Pasternack RF adapter provides good VSWR of 1.32:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
