Description

Pasternack's PE9758 BNC male to BNC male right angle adapter is part of our full line of RF components available for same-day shipping. Our BNC to BNC adapter has a male to male gender configuration. PE9758 BNC male to BNC male adapter operates to 4 GHz. This low profile right angle BNC adapter allows for easier connections in tight spaces.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
