Description

The PEWTR1011 is a WR-137 waveguide termination / load that operates in the frequency range of 5.85 GHz to 8.2 GHz. This WR-137 waveguide termination has a typical VSWR of 1.02:1. These waveguide termination designs are made of painted brass copper and incorporate a standard CPR-137G flanges.

Pasternack waveguide terminations / loads are designed so virtually all applied power is absorbed, thus assuring a low VSWR. The power rating on this WR-137 termination is 6 watts, other detailed specifications and a diagram drawing can be found on this datasheet PDF below. Pasternack offers a complete family of waveguide terminations that are in-stock for same day shipment.
